

Android User Manual

NUITEQ Campfire is a modern, touch-based software designed for meaningful entertainment and mental stimulation. Featuring a vast library of engaging, collaborative, and easy-to-use games, Campfire helps users stimulate their minds, sharpen focus, and unleash creativity, all while having fun.

Installing Campfire- Android

1. Download the Campfire Android APK. You can either download this on the device itself or copy it into the device from another device.

Note: You may need to enable the installation of APKs from Unknown sources on your device. You can do so from the Settings app on your device. Instructions vary by manufacturer.

2. Open the APK (using a file browser) and continue with the installation.
3. Launch NUI TEQ Campfire from your launcher and log in with your NUI TEQ account credentials, using your specific Campfire license to successfully log in.

Navigating Campfire

- Once launched, the Campfire application provides users with many engaging, interactive activities divided into five categories: Cognitive Games, Reaction Games, Misc, Leisure Games, and Creativity.
- At the bottom corners is the main menu navigation. Tapping the  will open menu options. This includes options to "Go back," "Close app," or "Help."

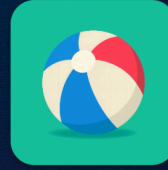

Cognitive Games

Reaction Games

Misc

Leisure Games

Creativity

Cognitive Games

Engage your mind with cognitive games that challenge memory, logic, and problem-solving skills. Explore a variety of academic activities and brain puzzles designed to make learning fun and interactive.

Cognitive Games

Addition

Animals

Bones

Cards

Count

Geography

Habitat

Match It

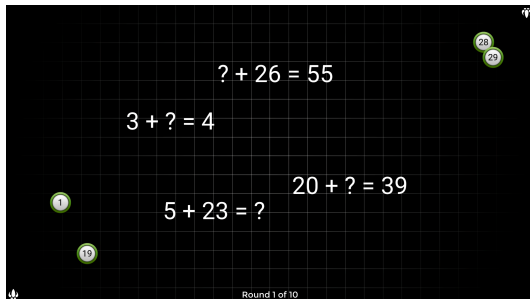

Jigsaw

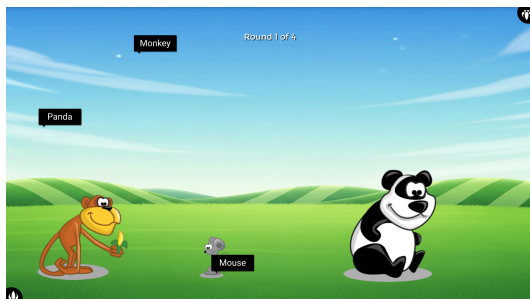

Stacks

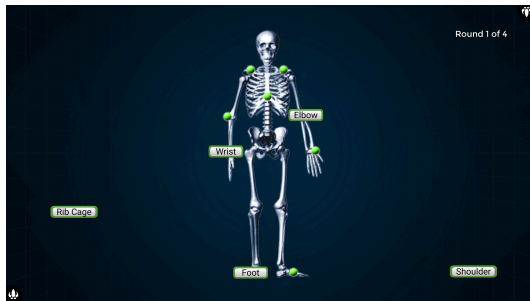

Untangle

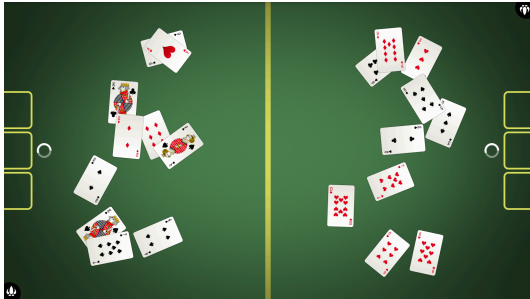

Addition: Practice addition skills by dragging the numbered dots to their correct position in the mathematical problem. Incorrect responses will flash red, while correct responses will illuminate in green.

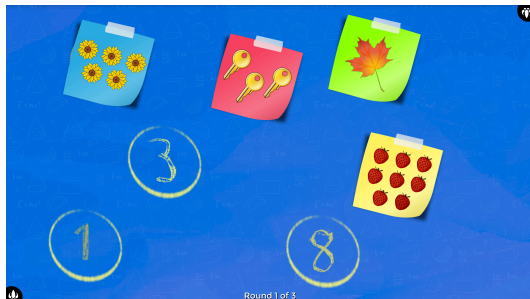

Animals: Identify the animals by dragging the animal name to the corresponding animal. Correct answers will be marked green, while incorrect responses will flash red.

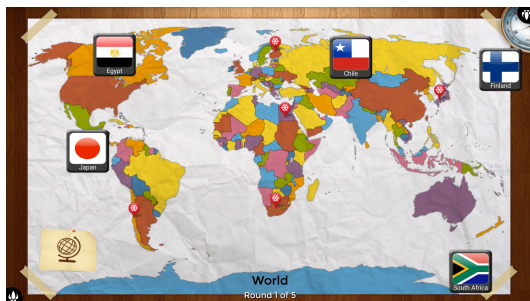

Bones: Identify parts of the skeletal structure by dragging the bone name to the correct location on the skeleton.

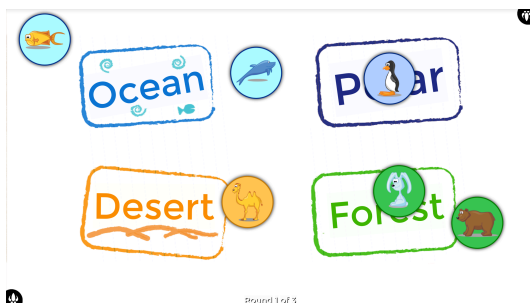

Cards: In this two-player game, users will compete to achieve the best poker hand. Drag the desired cards to the squares on the card table before the clock runs out.

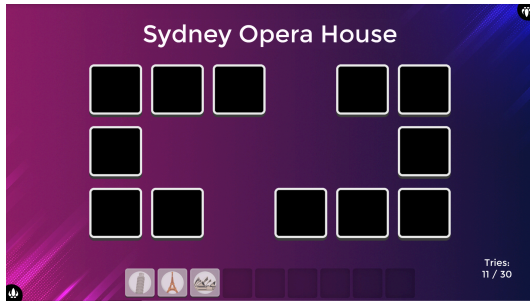

Count: Practice counting skills by dragging the picture cards to the correct number circle on the screen.

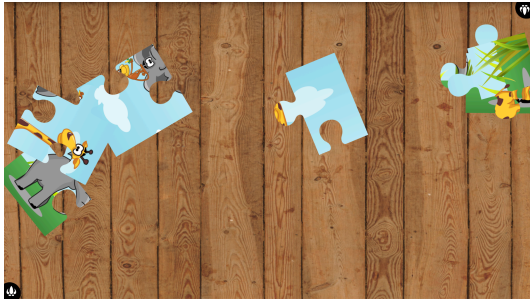

Geography: Choose from identifying countries on a world map or cities within a specific country in this geography skill game. Drag and drop the country flag/city name to the correct position on the map.

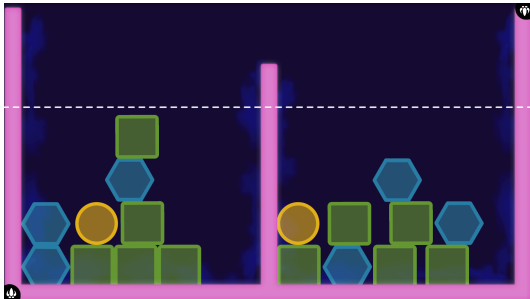

Habitat: Identify the habitats of different animals-choosing between ocean, polar, desert, and forest habitats. Drag the animal to their correct habitat on the screen.

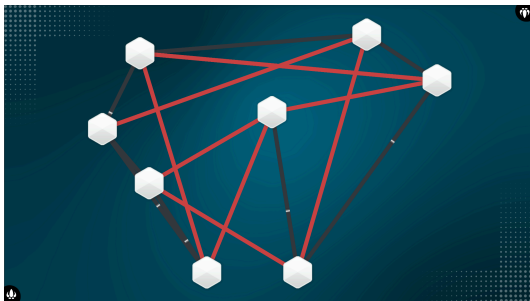

Match-It: Test your memory in this matching game. Select a desired category, then tap the card to reveal the contents. Tap a second card, aiming to find the matching pair. Matched cards will be collected at the bottom of the screen.

Jigsaw: Begin by selecting an image for your puzzle. Assemble the pieces to complete the puzzle.

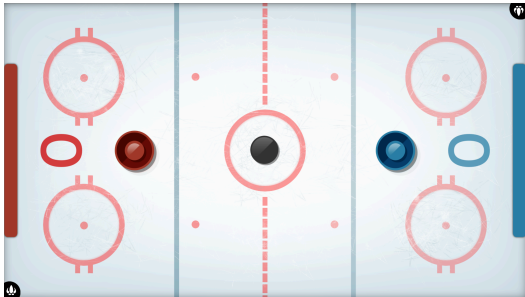

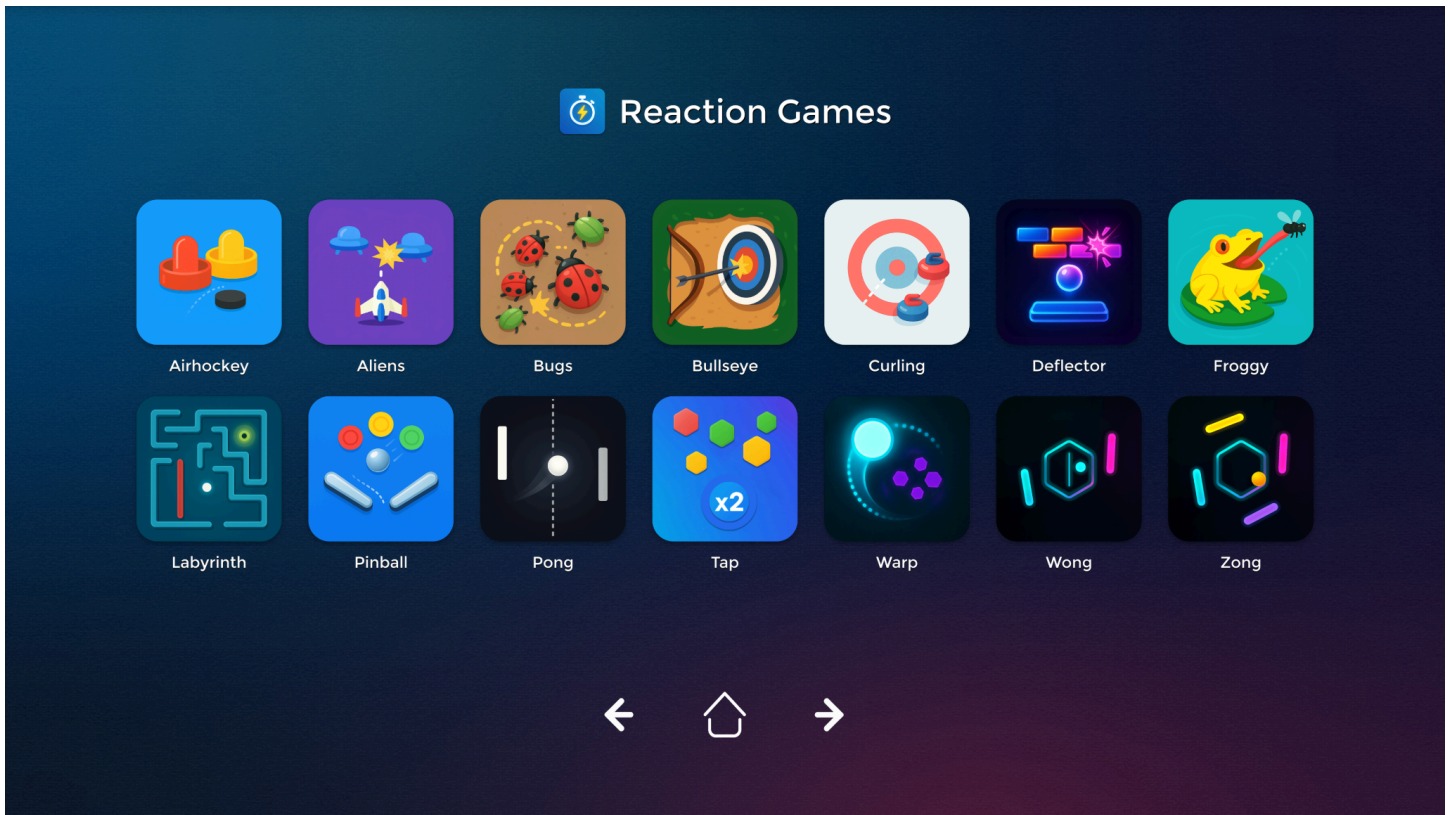

Stacks: Drag and drop the objects to stack them as quickly as possible to reach the top

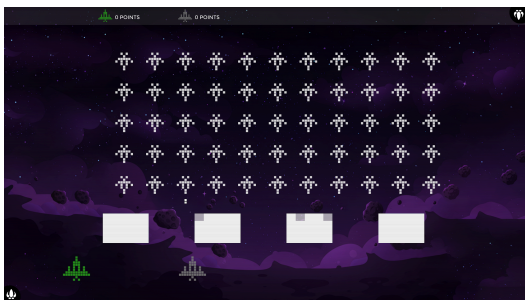

Untangle: Start by choosing your desired difficulty level. The goal is to untangle all the lines by moving the dots around.

Reaction Games

Test your reflexes with Reaction Games that challenge speed and precision. Play solo or with friends in exciting matches like Airhockey, Pong, and Pinball, where quick thinking leads to victory.

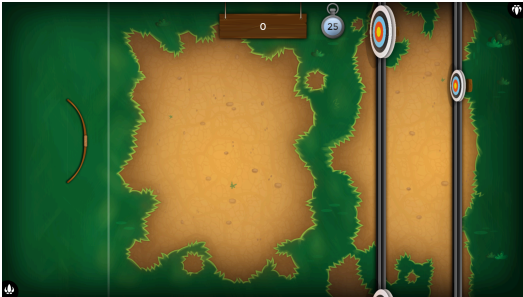

Airhockey: Take hold of the paddle using your finger and maneuver it to control its movement. Utilize the paddle to aim and shoot the puck into the goal. Outscore your opponent to secure victory in the game.

Aliens: Choose your spaceship and use your finger to glide it from side to side. Tap the spaceship to fire at the aliens as they try to shoot you and your blocks.

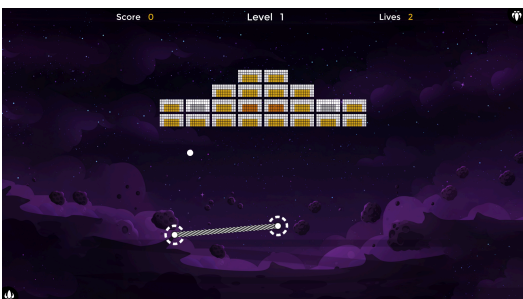

Bugs: Use your finger to draw a circle around two or more bugs of the same species- creating a larger bug. The goal is to merge all bugs of the same species.

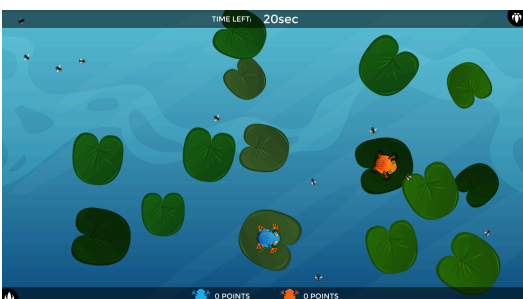

Bullseye: This is a shooting game where players aim at moving targets to score points before time runs out. Players can place the slingshot in the shooting area by tapping the screen, then aim and draw with a second touch on the string.

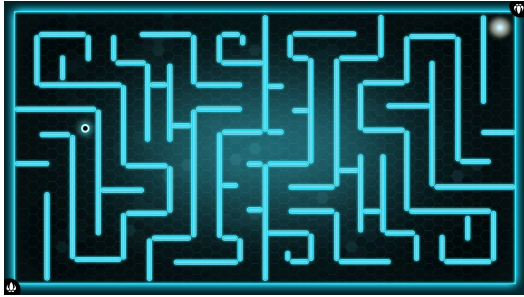

Curling: Choose either two or four players. Use your finger to select the curling stone, then slide and release it, aiming for the center target. Points will be awarded based on how near you are to the center.

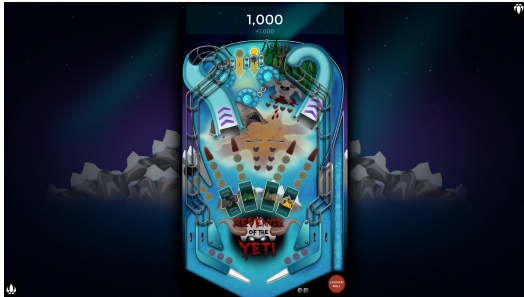

Deflector: Use two fingers to create a paddle. Then try to break the grid to advance to the next round.

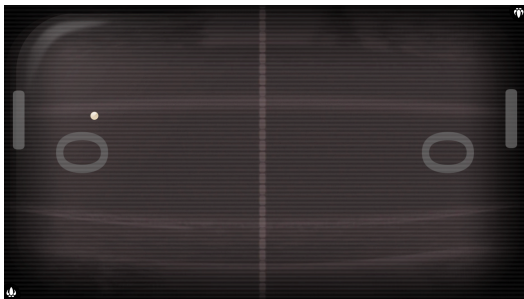

Froggy: Aim to catch as many flies as possible to achieve a high score. Drag a frog to a different leaf to prompt a jump. Touch and drag the leaf with the frog to rotate it. Tap the frog to try and catch a fly.

Labyrinth: Choose your disc icon. Guide the disc through the labyrinth by sliding it with your finger. Be careful not to hit the walls. Aim to complete the task in the shortest time possible.

Pinball: Press and hold "Launch ball" to send the ball into the playfield. Next, tap the pinball flippers to strike the ball and keep it from dropping into the drain.

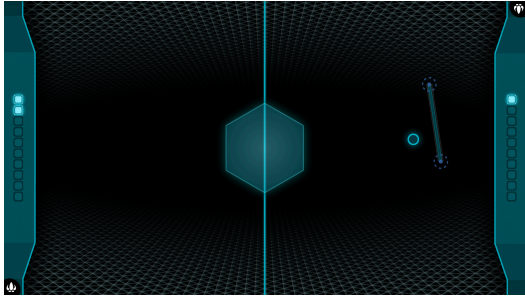

Pong: Much like the timeless game of table tennis, the objective is to score against your opponent. Utilize your finger to maneuver the paddle and redirect the ball.

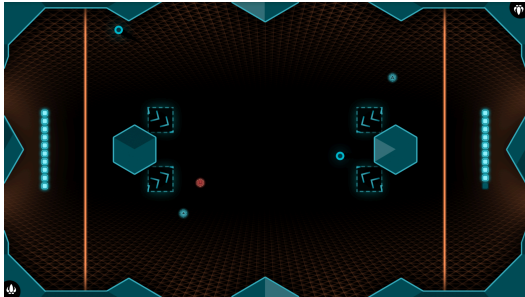

Tap: Quickly tap the increasing number of buttons to achieve the highest score possible. The game concludes once there are more than twenty buttons displayed on the screen.

Warp: To control the disc, touch and move it as needed. Create circles around the enemies to eliminate them, and be sure to steer clear of any collisions with them.

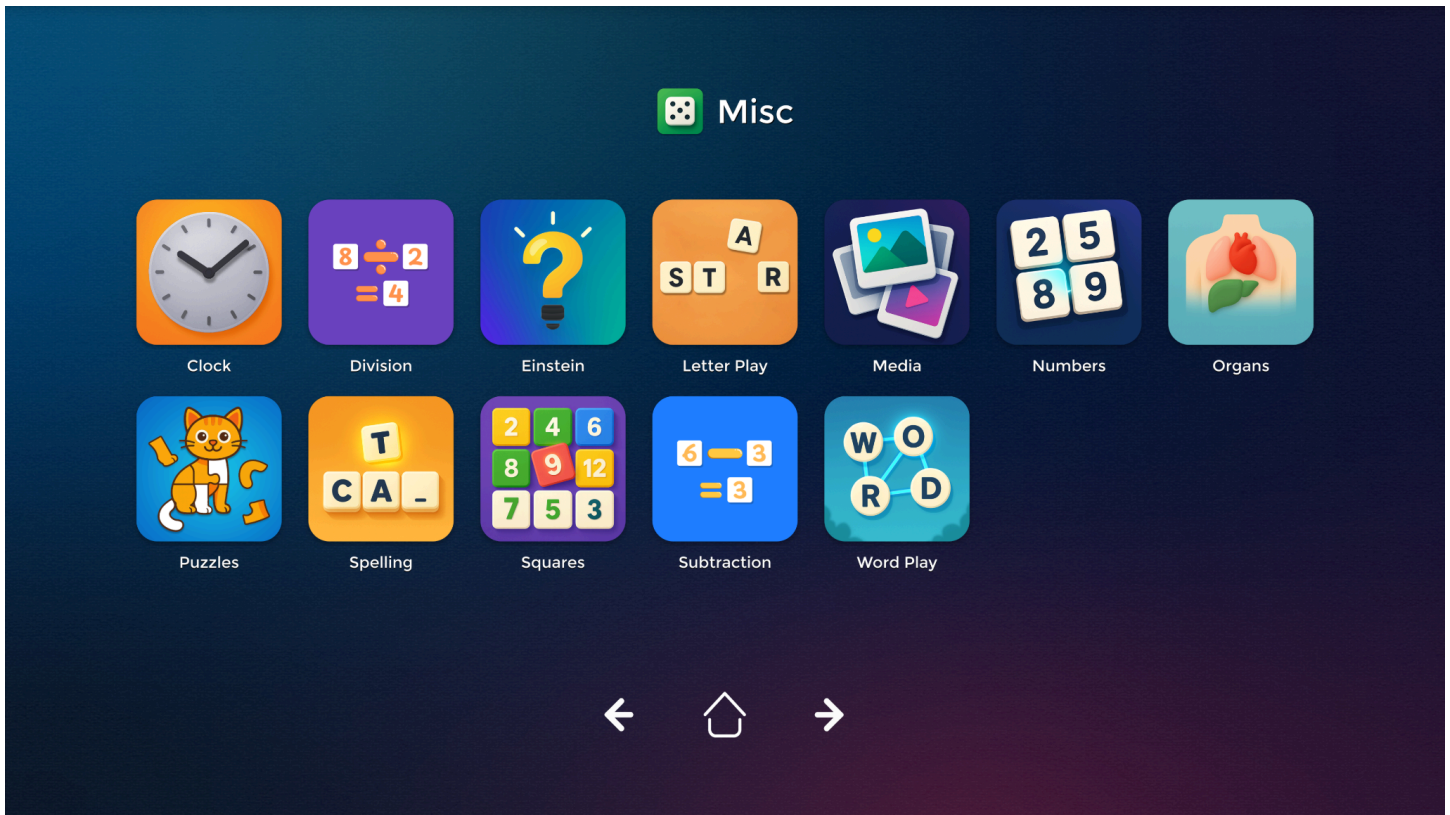

Wong: To create walls, place two fingers on the screen, ensuring that the wall isn't too long to avoid breaking it. You can score points by bouncing the ball off your wall while positioned behind your opponent.

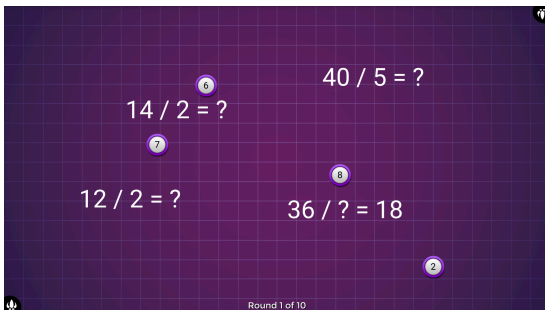

Zong: Select either 2, 3, or 4 players. Use two fingers to form a wall that protects your goal. The game concludes when a player's score drops to zero.

Misc

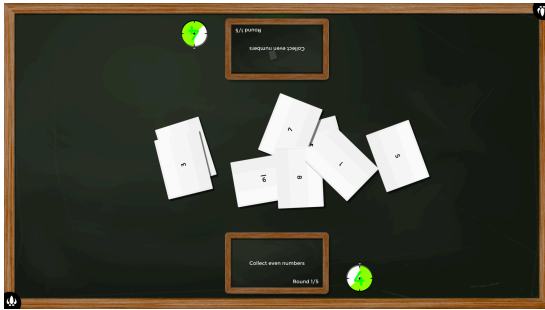

Explore a mix of math challenges, spelling games, puzzles, and matching activities that keep your mind sharp and engaged. A fun variety of brain-boosting games for every kind of learner!

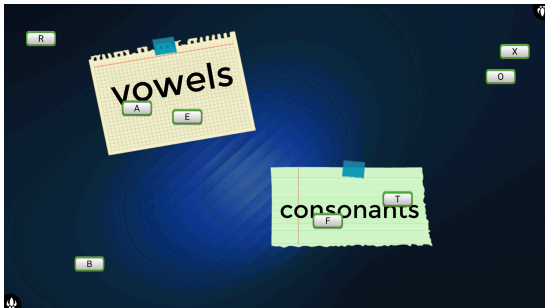

Clock: Choose the difficulty level, and then drag the hands of the clock to match the time specified in the question.

Division: Practice division skills by dragging the numbered dots to their correct position in the mathematical problem. Incorrect responses will flash red, while correct responses will illuminate in green.

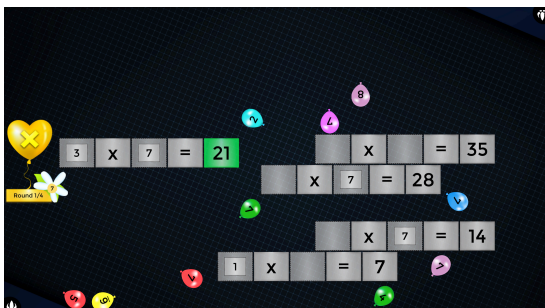

Einstein: Drag and drop the correct cards into the category tray, located at the edge of the screen.

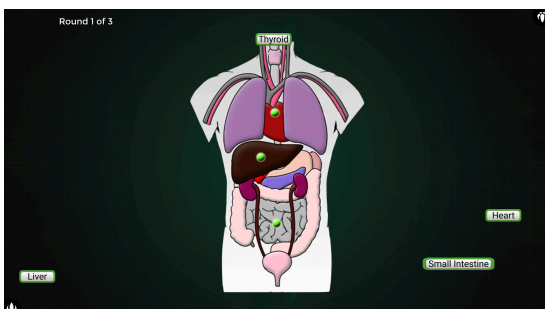

Letter Play: Practice letter skills by dragging the letter tiles to their respective categories on the screen.

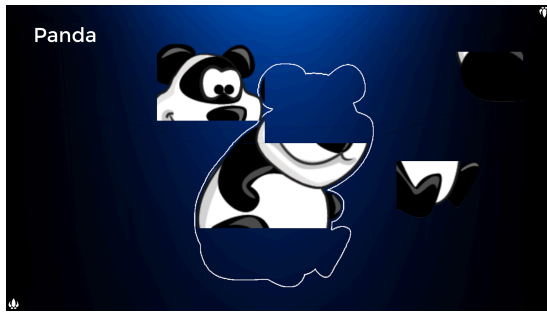

Media: Present and interact with different images, all in one place.

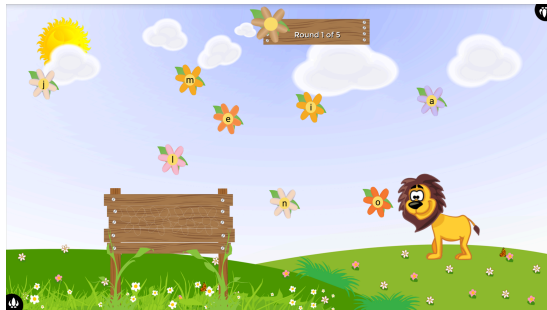

Numbers: Select the type of mathematical problem, then drag and drop the balloons to the correct location in the equations.

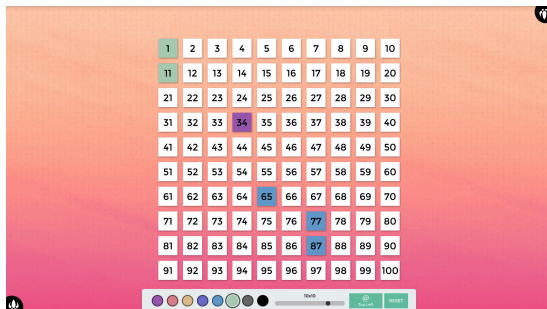

Organs: Identify organs in the body by dragging the organ name to the correct location on the body diagram.

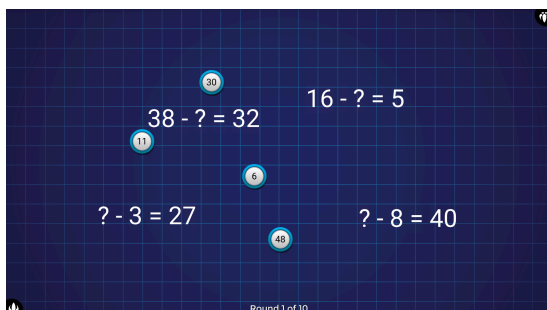

Puzzles: Identify details and patterns organized in a defined picture. Select the desired picture to begin, then move the pieces to the correct location within the puzzle outline.

Spelling: Practice spelling skills by dragging letters to spell the name of the animal on the screen.

Squares: Explore number patterns in the grid. Choose a color and then tap the numbers.

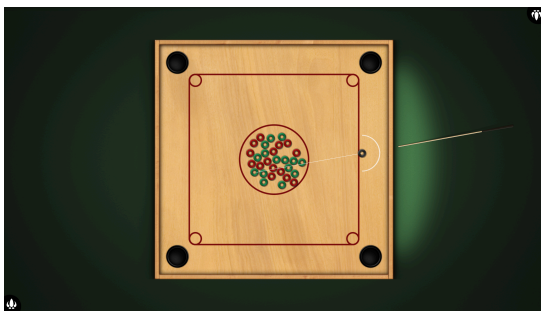

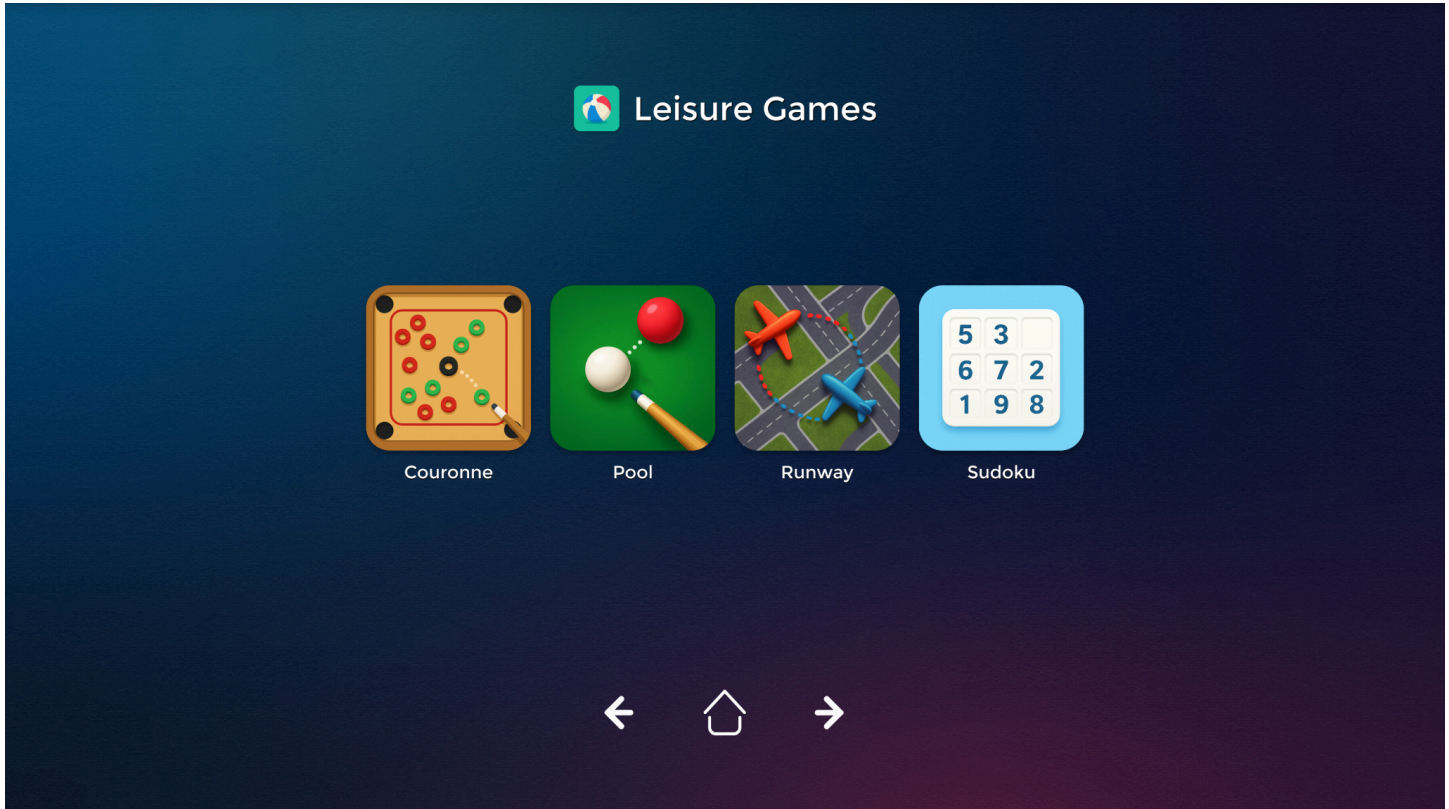

Subtraction: Practice subtraction skills by dragging the numbered dots to their correct position in the mathematical problem. Incorrect responses will flash red, while correct responses will illuminate in green.

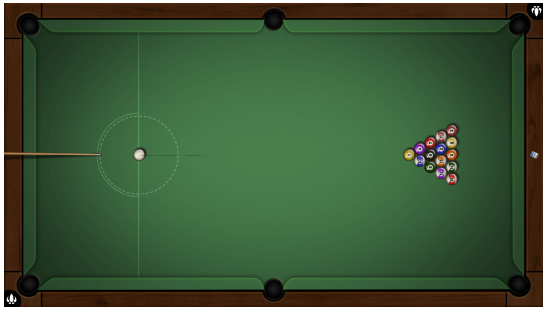

Word Play: Complete the sentences by dragging the missing word into the blank line.

Leisure Games

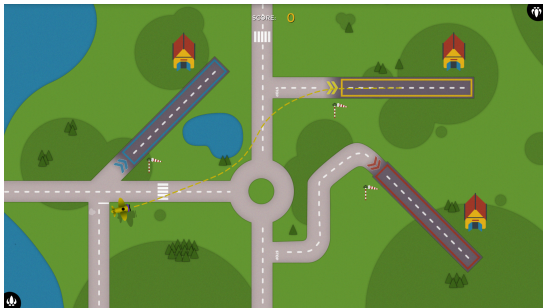

Relax and unwind with Leisure Games like pool and sudoku, perfect for a calm break or casual play. Enjoy games that combine focus and fun at your own pace!

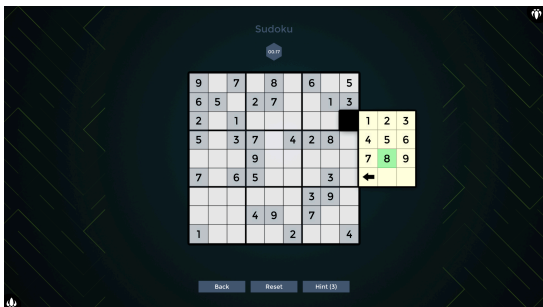

Couronne: Position the queen disc outside the boundaries indicated by the red rectangle. After placing it, touch within the semi-circle and drag to generate power for your shot. Release to take the shot. The objective is to sink all the discs of your color.

Pool: Select from 8-ball, 9-ball, or snooker pool. To power your shot, touch within the circle and drag backward. Rotate around the cue ball to adjust your aim.

Runway: Guide the planes to their designated color landing zones while steering clear of any collisions with other aircraft.

Sudoku: Select your desired difficulty level. Utilize logic and reasoning to complete a 9x9 grid with the digits 1 through 9. Remember, numbers cannot be repeated in any row, column, or 3x3 section. Click "hint" to uncover a number if needed.

Creativity

Unleash your imagination with Creativity that lets you play musical instruments like drums and piano, or explore artistic tools for drawing and special effects. Express yourself through sound, color, and creativity!

Creativity

Draw

Drums

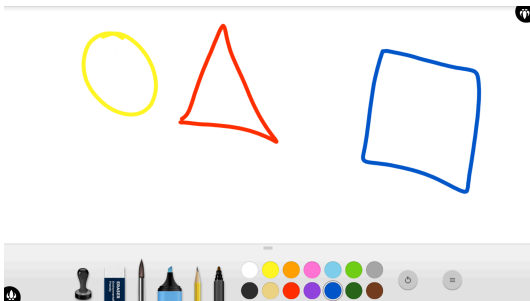

FX

Gravito

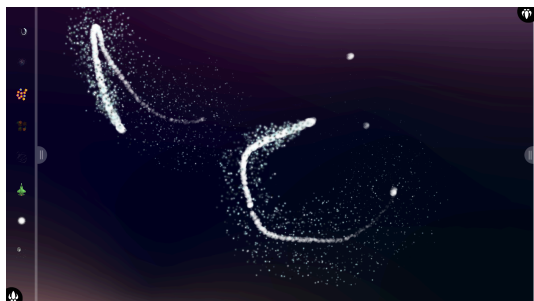

Piano

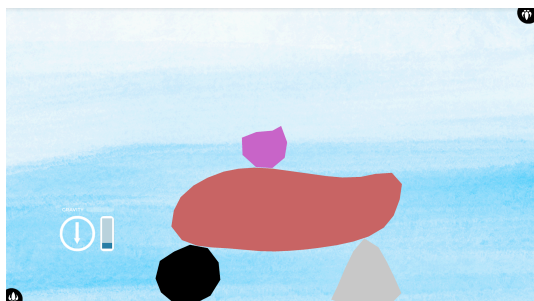

Draw: Choose a variety of different drawing tools, including brush, pencils, marker, highlighter, and stamps. Then select a desired color from the palette. The eraser tool can be used to swipe erase.

Drums: Tap the drum kit to create percussive sounds.

FX: Access the special effects tools located on either side of the screen. Next, swipe anywhere across the screen to explore various effects, such as flames, bubbles, flowers, and stars.

Gravitoy: Start by drawing shapes on the screen. Next, modify the gravity and direction using the icon located on the left. Pay attention to how variations in gravity influence the shapes. To link shapes together, select "create joint" from the corner menu and draw a line connecting the two shapes.

Piano: To create music, simply tap the piano keys. You can adjust the key selection using the slider located at the top. Choose from grand piano, bass, or guitar sounds. Press the record button to capture your sound, and hit play to listen to the playback.
