

AI Assistant User Manual

The award winning NUI TEQ Chorus AI Assistant allows users to effortlessly create a variety of teaching and learning materials.

Navigation

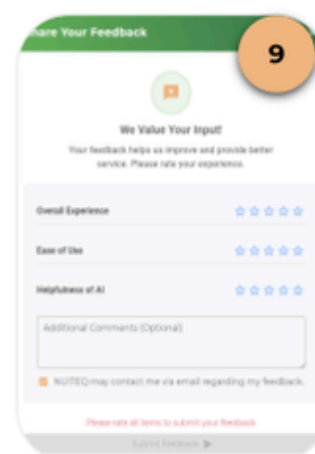

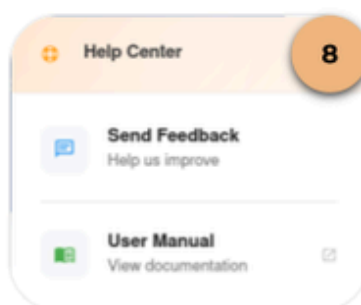

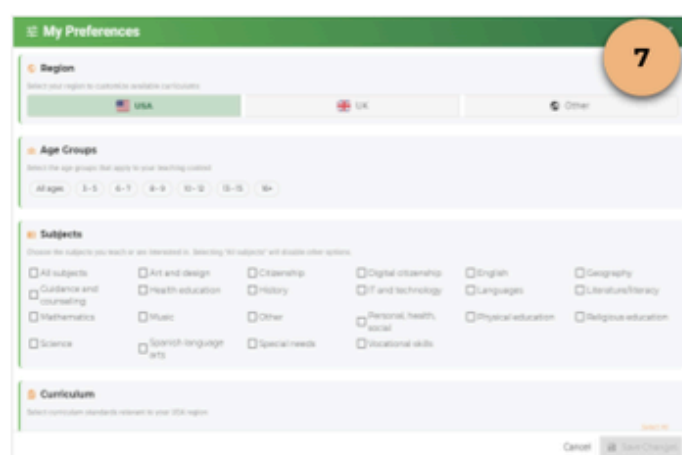

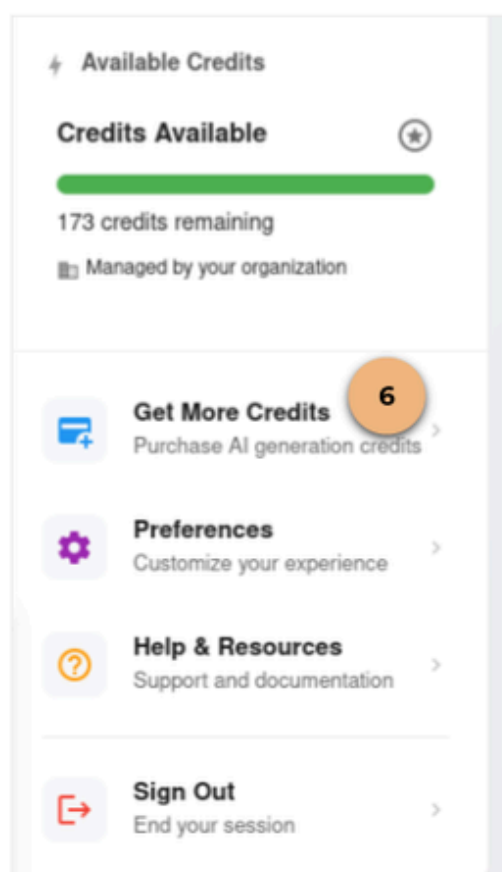

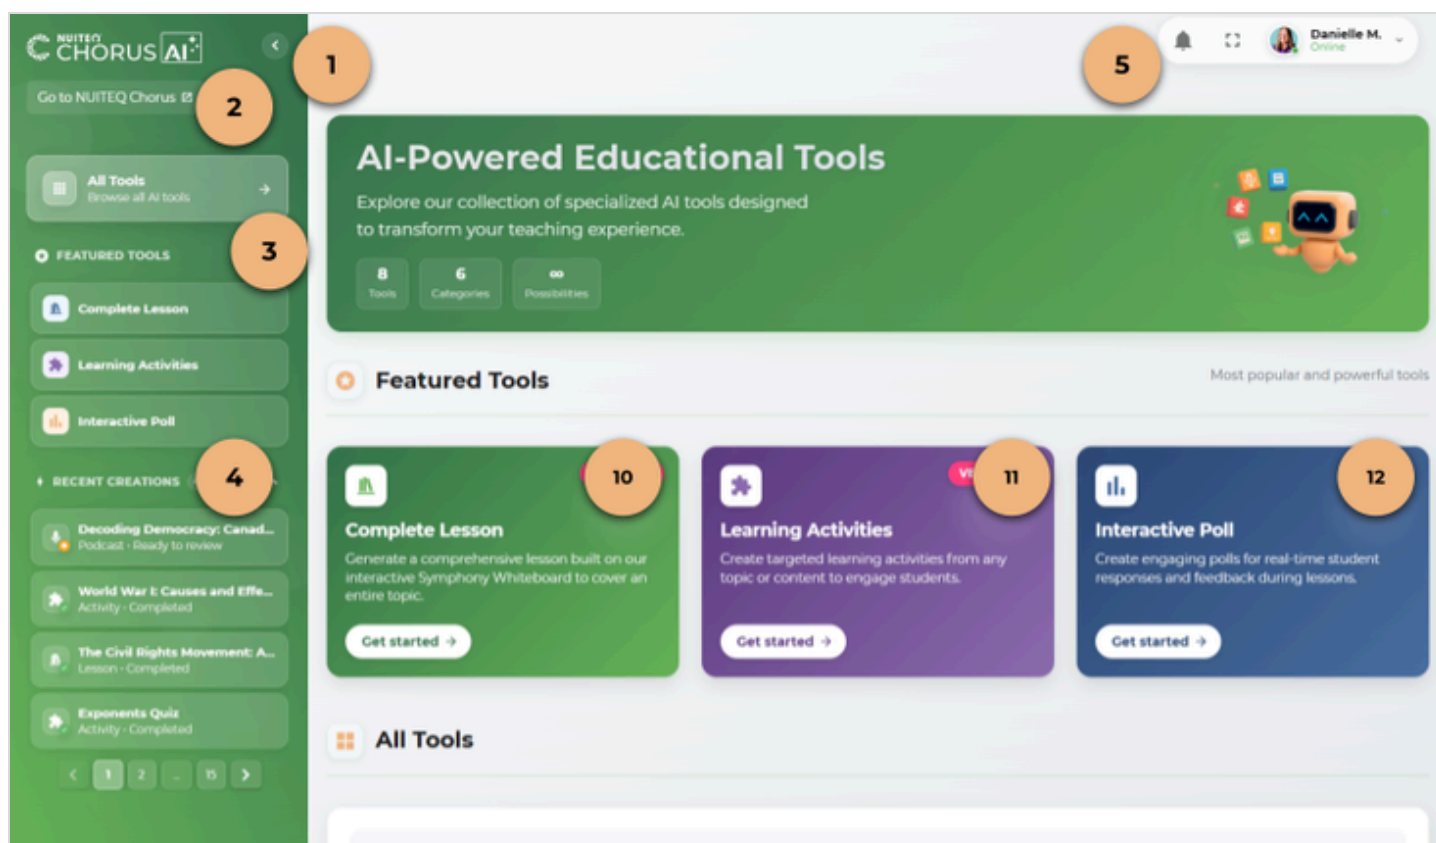

The AI Assistant can be accessed from the Chorus dashboard. Once selected, a new window will open with the AI Assistant dashboard.

The left side of the screen is the AI Assistant menu. This includes the option to collapse the sidebar (1) and navigate to NUI TEQ Chorus (2). The menu also includes the featured AI tools (3) as well as view recently generated AI Assistant creations (4).

The top right of the screen will show the user profile, notifications, and full screen enablement (5). When the profile icon is selected, a popup will appear indicating the number of available AI Assistant credits. Here you will find options to request additional credits (6). Selecting "Preferences" will open an pop up (7) that allows users to customize their experience by choosing geographic region, student age group, subject area, and curriculum/academic standards. Choose "Help & Resources" (8) to open the help center. Here you will be able to select sending feedback (9) to the NUI TEQ team so that we can continue to improve the AI Assistant experience or open the User Manual. Lastly, "Sign out" will end your AI Assistant session.

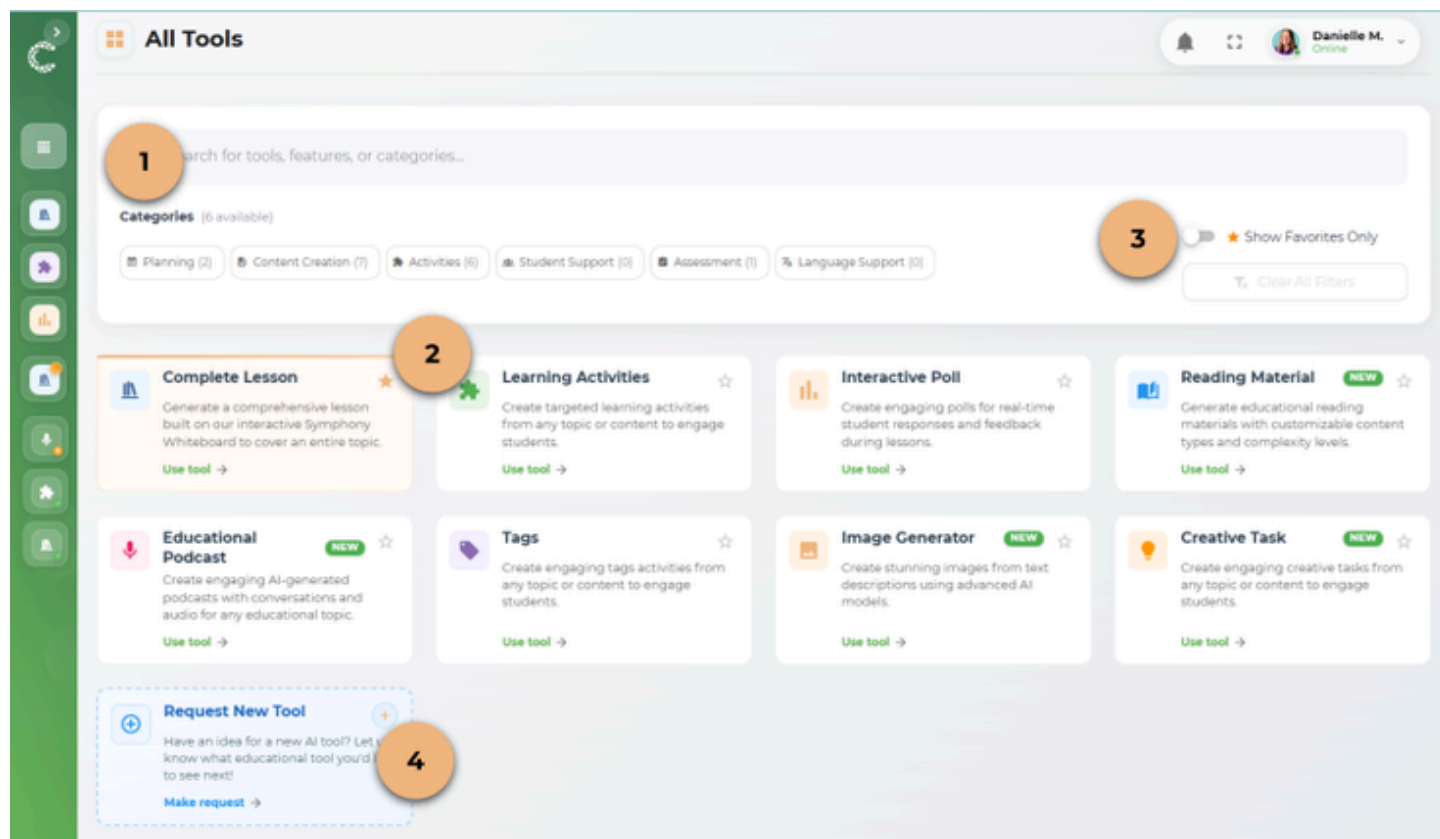

The featured tools section of the AI Assistant includes options for Complete Lesson (10), Lesson Activities (11), and Interactive Poll (12). More information about each of these features can be found in this user manual.

Navigating the “All Tools” Section

By scrolling down to the “All Tools” section, you can explore all the available AI Assistant teaching and learning tools. To find a specific tool, utilize the search bar (1) or apply the

categories to filter your options. Selecting the star (2) next to each tool will add it to your favorites. You can also toggle the “Show Favorites Only” (3) option to display only the tools you have favorited. As NUITEQ continually aims to enhance user experience, we encourage you to use the “Request New Tool” (4) feature to inform our team about any new tools you wish to see. More information about each AI Assistant tool can be found in this user manual.

Navigating the “All Tools” Section

The AI Assistant is able to generate a variety of teaching and learning materials. The following section will explain each AI Assistant tool.

Complete Lesson

Complete Lesson

Generate a comprehensive lesson built on our interactive Symphony Whiteboard to cover an entire topic.

Get started →

Choosing the “Complete Lesson” option enables users to craft comprehensive lessons using the interactive Symphony whiteboard. This lesson will encompass an entire subject matter and integrate various digital media components. Select “Get started” to begin.

Step 1: Configure Lesson

To begin building your AI Assistant Complete Lesson, enter in a prompt in the text box (1). You can also attach files, align to educational standards, input the prompt via voice, and

view example prompts using the icons below the text box. The AI Assistant will evaluate the quality of your prompt, and you have the choice to permit the AI to enhance it.

Next, select the lesson duration (2), choosing between a single lesson or multi-day unit. Then select the appropriate age group (3) of your students. The AI Assistant also supports a diverse range of languages (4). Select the difficulty level (5) to determine how challenging you wish the lesson to be.

The final step in configuring your lesson is determining the digital media lesson components (6) you wish you include. Options are Reading Material, Watch Content (YouTube videos), Podcast Episodes, Interactive Activities, Creative Tasks, and Assessments. More information for each component is found in this user manual. Select the “Create Lesson” icon to advance to the next step.

Podcast Episode @1

Interactive Activities @0.5

Creative Tasks FREE

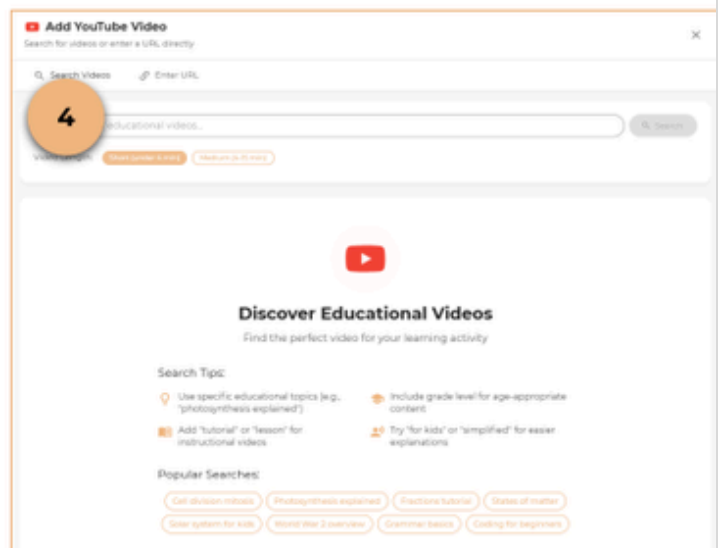

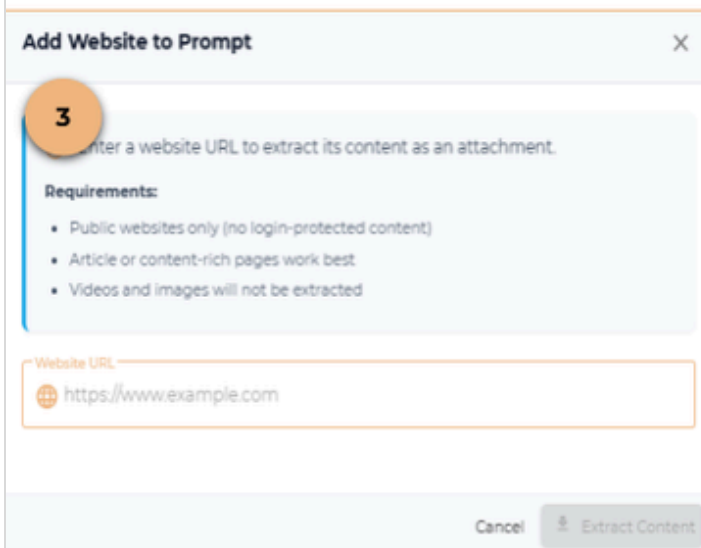

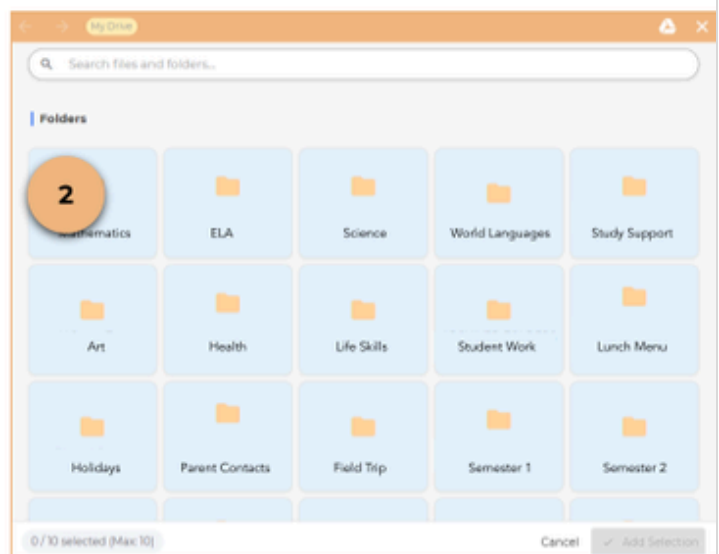

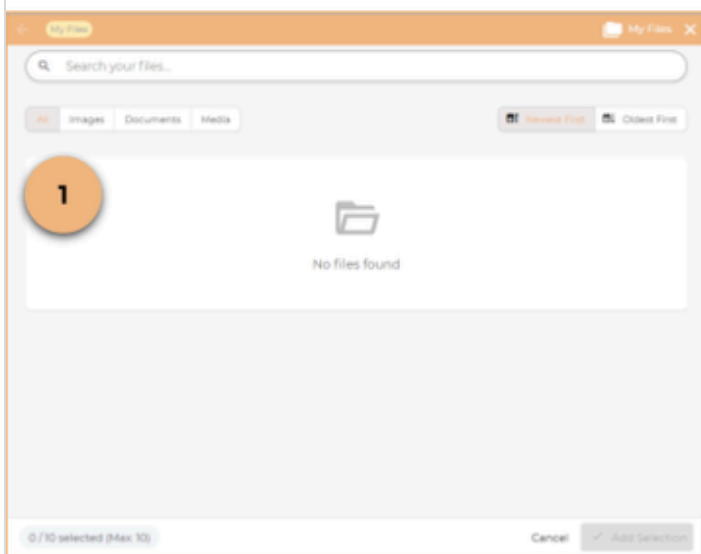

Assessment @0.5

Optional Configuration: Attach Files

The AI Assistant allows users to attach digital media to the “Lesson Topic” text bar by selecting the paperclip icon. Once selected, options for uploading include: From My Files (1), From Google Drive (2), From Computer [hard drive], From Website (3), or From YouTube (4). The supported file types are png, jpg, pdf, mp4, mp3, doc, and ppt.

Note: Digital media can be added to all text prompts.

- 1  From My Files
- 2  From Google Drive
-  From Computer
- 3  From Website
- 4  From YouTube

Optional Configuration: Align with educational standards

Educational standards can be added to any text prompt by selecting the graduation cap icon. This will open a popup in which you can choose your appropriate regional curriculum

(1). Then, use the filters to further adjust for subject and age group or use the text box to search for specific standards. Choose the “Select” (2) icon to add the standard to your prompt.

Empowered Learner

Students build networks and customize their learning environments in ways that support the learning process.

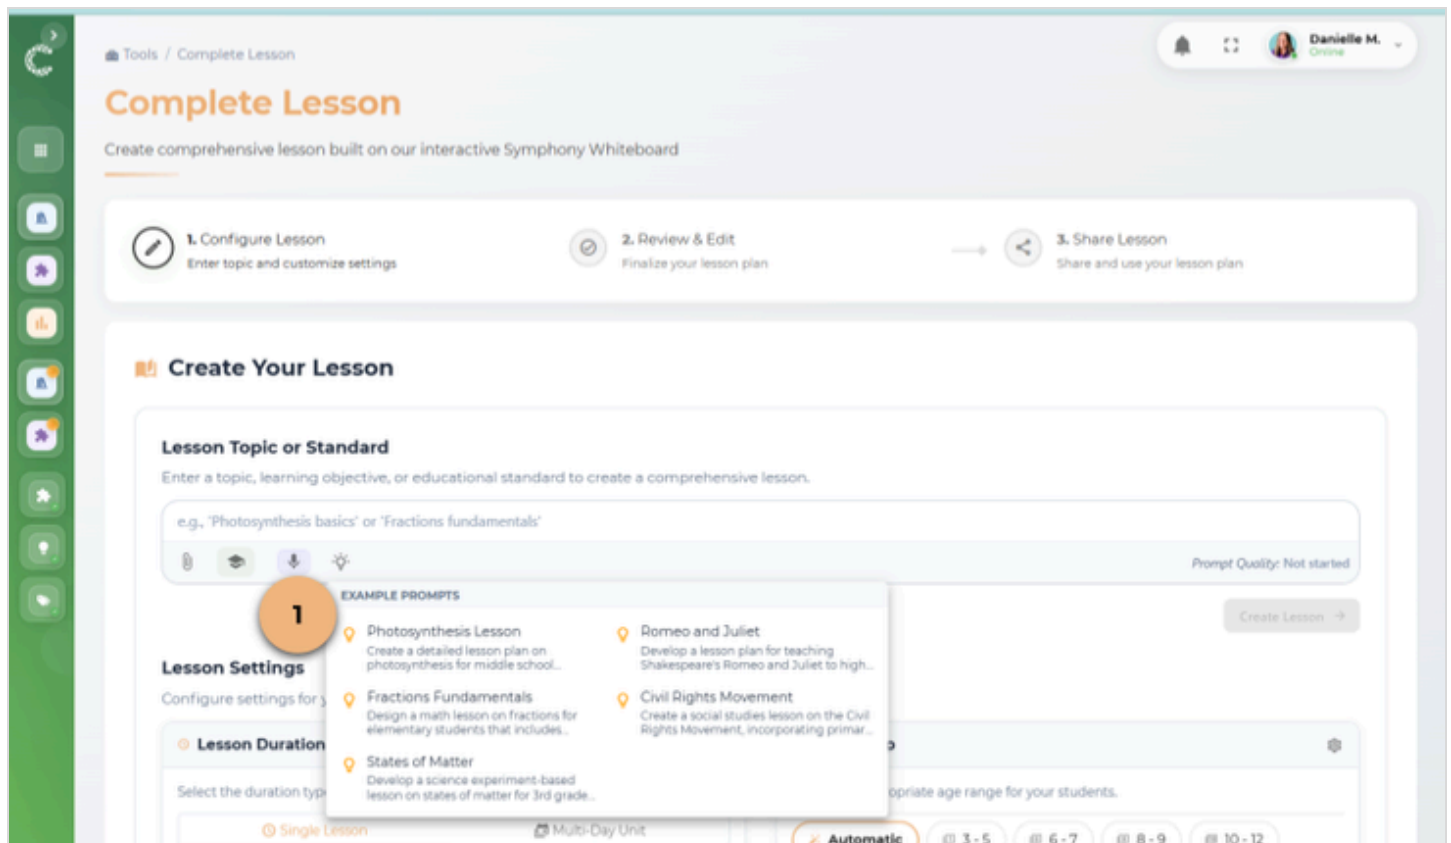

Optional Configuration: Input prompt via voice

Prompts for the AI Assistant can also be added via voice by selecting the “Input prompt via voice” microphone icon. As you speak, the AI Assistant will record and provide a text version of your prompt. Choose “Stop Recording (1) and then “Insert Text” (2) to add the prompt to the configuration.

Optional Configuration: Show example prompts

Choosing the “Show example prompts” option (1) will open a window displaying example prompts designed to spark your creativity. By clicking on any of the example prompt options, you will automatically insert that text into the text field.

Step 2: Review & Edit

This stage of lesson generation enables you to further tailor and modify each lesson component before adding them to the Symphony whiteboard.

To the left of the screen you will see the AI Assistant quick actions and chat. The quick actions (1) include the following options:

- Scaffold the Lesson
- Add More Steps
- Add Assessment
- Extend to Multi-Day
- Adjust Difficulty
- Increase Interactivity
- Translate Language
- Adjust Age Group
- Add Engaging Storytelling

Additionally, you can interact with the AI Assistant through the chat box (2) by entering specific commands in the text field or by utilizing voice dictation.

Further customizations include editing the lesson title (3), adding additional steps to the lesson (4), and reordering the components (5) by dragging and dropping into the desired location. Individual components can be edited, replaced with AI suggestions, or deleted (6). When you are satisfied with the lesson components, select "Create items" (7) to generate the Symphony whiteboard. You will also see the total credits required for creation.

Lesson Steps 5 activities • Cognitive levels: DOK1, DOK2, DOK3 5 steps

4 Add step

5 Introduction to Photosynthesis

READING MATERIAL

Read a short passage defining photosynthesis and its importance to life on Earth. Focus on the basic equation: Carbon Dioxide + Water + Sunlight -> Glucose + Oxygen.

6 DOK1 0.5

Visualize the basic concept of photosynthesis and its role in producing energy and oxygen.

Photosynthesis Animation

VIDEO CONTENT

Watch an animated video illustrating the process of photosynthesis at the cellular level, showing chloroplasts, chlorophyll, and the movement of molecules.

DOK2 FREE

Visualize the process of photosynthesis and the role of key components within a plant cell.

Photosynthesis Equation Challenge

INTERACTIVE ACTIVITY

Arrange the components of the photosynthesis equation [Carbon Dioxide, Water, Sunlight, Glucose, Oxygen] in the correct order to represent the reaction.

DOK3 0.5

Reinforce understanding of the inputs and outputs of photosynthesis

Step 3: Share Lesson

During the final review phase, you have the opportunity to preview and edit specific components of the lesson. The “Lesson Steps” (1) describes the number of activities within the lesson as well as the level of Webb’s Depth of Knowledge (DOK). Select “Edit Activity” (2) to review and edit individual elements. The user manual contains the interface for the edit screen of each component. When you are ready for the AI Assistant to create your lesson select the “Finish Lesson & Create Symphony” (3) icon.

Edit Activity: Lesson Component Customizations

1. Reading Material

Customizations for reading passages include the AI Assistant quick actions (1). This includes:

- Simplify Language
- Add Examples
- Add Key Vocabulary
- Incorporate a Storyline
- Create Summary
- Expand Content
- Add Comprehension Questions
- Translate
- Fix Grammar
- Suggest Visual Elements

You can engage with the AI Assistant via the chat box (2) by typing specific commands in the text field or by using voice dictation.

To manually modify the content within the reading passage, simply type directly in the document or utilize the toolbar (3) to adjust formatting, insert hyperlinks, images, and other features. When you are satisfied with any changes, select the "Finish Review" (4) icon.

Video content embeds YouTube videos into the Symphony whiteboard. The AI Assistant will search for and add a video most relevant to the lesson topic and audience. To view other videos, explore the “Suggested Videos” (1) option. Or search for a specific YouTube video using the search bar (2).

The screenshot displays the Symphony whiteboard interface. At the top, there is a navigation bar with a "Back to Lesson" link and a title "Photosynthesis: Capturing Sunlight's Ener..." followed by "Photosynthesis (UPDATED)". Below this, a video player is embedded, showing a video titled "Photosynthesis (UPDATED)". The video content features a green background with a large yellow circle on the left labeled "light energy", a central gear-like shape with a red play button, and an orange hexagon on the right with a face and labeled "glucose". A large white arrow points from the light energy circle towards the glucose hexagon. Below the video player, there is a "SUGGESTED VIDEOS" section. This section has a tab labeled "1" and a search bar labeled "2". Below the tab, there are four video thumbnails:

- Photosynthesis**: A diagram showing the light-dependent reactions and the Calvin cycle. The title is "Photosynthesis - Light Dependent Reactions and the Calvin Cycle".
- Photosynthesis & Cellular Respiration**: A diagram showing a sun, a plant, and a mitochondrion. The title is "Photosynthesis and Cellular Respiration - Energy Cycle of Life".
- Photosynthesis**: A diagram showing a sun, a plant, and arrows indicating the flow of carbon dioxide, water, oxygen, and glucose. The title is "Photosynthesis | What is photosynthesis? | Step-by-step process".
- Chemical Reactions**: A diagram showing the chemical equation for photosynthesis: $6\text{CO}_2 + 6\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$. The title is "Chemical Reactions".

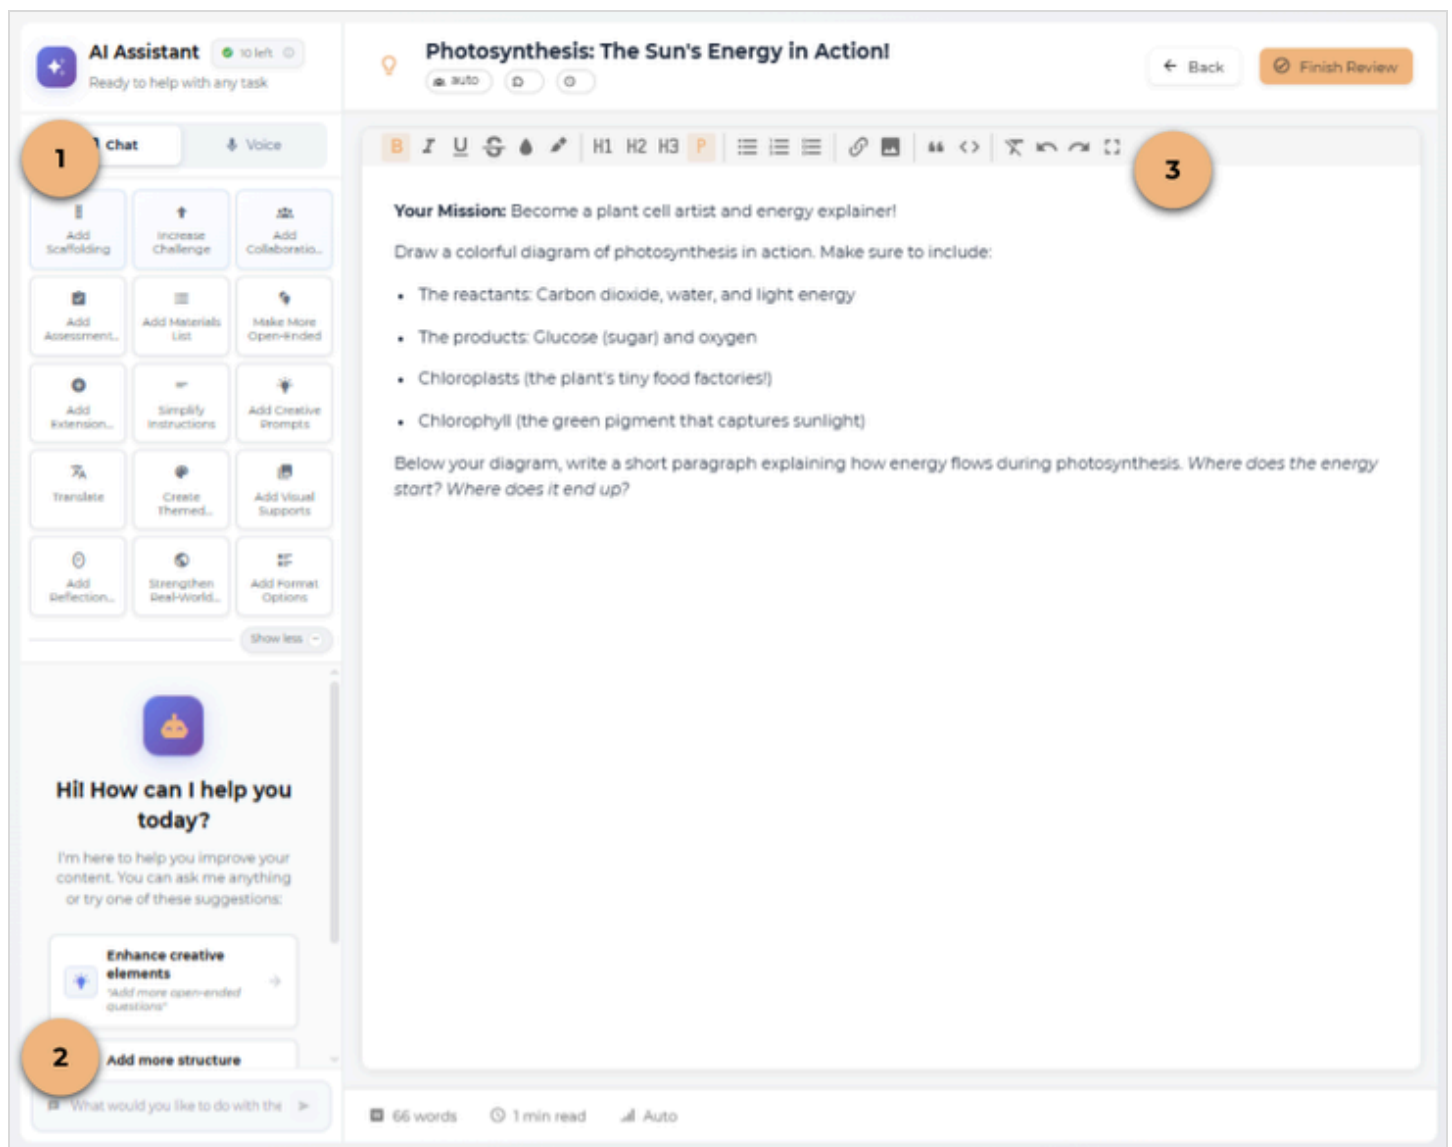

4. Creative Task

Customizations for Creative Task include the AI Assistant quick actions (1). This includes:

- Add Scaffolding
- Add Collaboration
- Add Materials List
- Add Extension Activities
- Add Creative Prompts
- Create Themed Variation
- Add Reflection Component
- Add Format Options
- Increase Challenge
- Add Assessment
- Make More Open-ended
- Simplify Instructions
- Translate
- Add Visual Support
- Strengthen Real-World Connections

You can interact with the AI Assistant through the chat box (2) by entering specific commands in the text field or by utilizing voice dictation.

To edit the content within the Creative Task manually, just type directly in the document or use the toolbar (3) to change formatting, insert hyperlinks, images, and other features.

5. Interactive Activities & Assessments

The Interactive Activities and Assessments develop engaging lesson activities designed to evaluate students' comprehension of the lesson concepts. The AI Assistant provides quick actions (1) that include:

- Generate similar items
- Decrease difficulty
- Increase difficulty
- Fix grammar
- Translate
- Incorporate a storyline

You can interact with the AI Assistant through the chat box (2) by entering specific commands in the text field or by utilizing voice dictation.

Depending on the lesson activity type, additional customization options will appear (3). The AI tool (4) will also increase or decrease difficulty and fix grammar for specific rounds, sequences, groups, or questions within the lesson activity.

2 Hi! How can I help you today?
I'm here to help you improve your content. You can ask me anything or try one of these suggestions:
Generate similar items: "Add 2-3 more items like the ones above"
Adjust difficulty level: "Make these questions easier for 8th graders"
Improve and polish: "Fix any errors and make it more engaging"

3 Photosynthesis: Arranging the Steps 2 sequences Settings Add Sequence Finish Review

4 Photosynthesis - Light-Dependent Reactions Edit AI [Red Flag]

SEQUENCE ITEMS (4)

- 1 Light energy is absorbed by chlorophyll.
- 2 Water molecules are split, releasing electrons, hydrogen ions, and oxygen.
- 3 Electrons move through the electron transport chain.
- 4 ATP and NADPH are produced, storing energy.

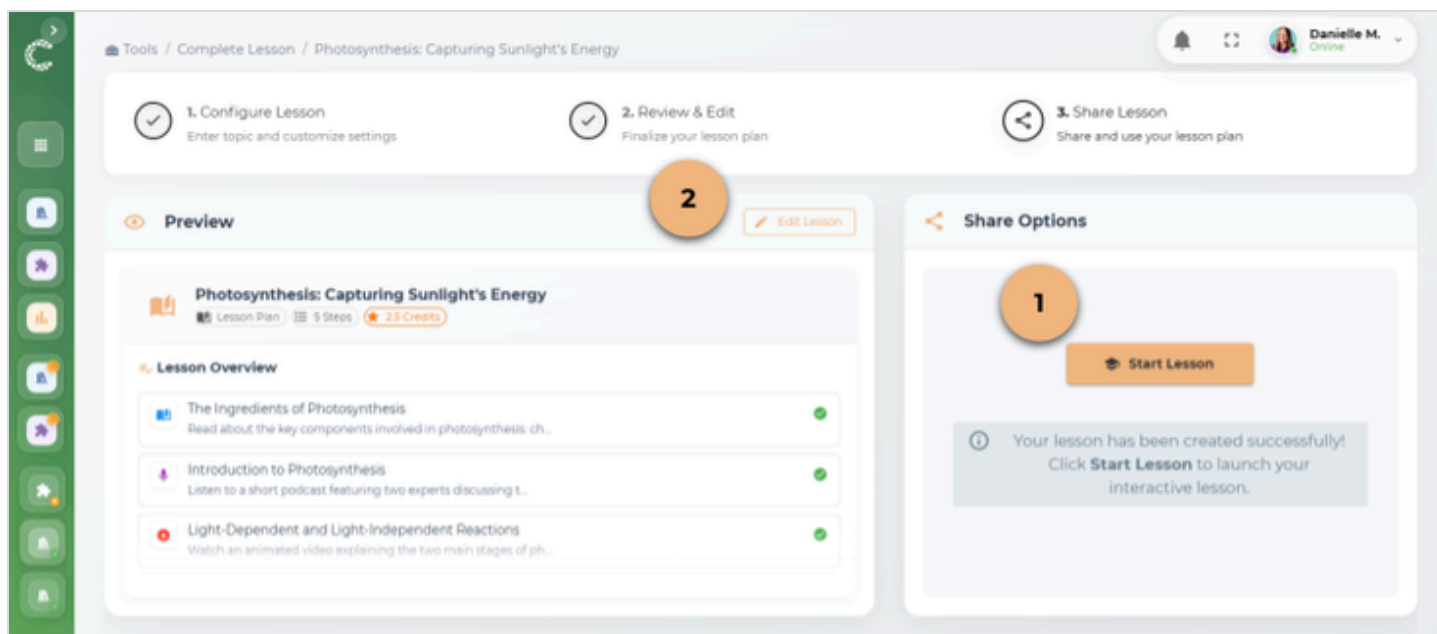

Photosynthesis - Light-Independent Reactions (Calvin Cycle) Edit AI [Red Flag]

SEQUENCE ITEMS (4)

- 1 Carbon dioxide is captured from the atmosphere.
- 2 CO₂ combines with RuBP to form a 6-carbon molecule.
- 3 ATP and NADPH are used to convert the 6-carbon molecule into glucose.
- 4 RuBP is regenerated to continue the cycle.

Step 4: Share Options

Your lesson activity is now ready to share. Select "Start Lesson" **(1)** to open the complete lesson on the Symphony whiteboard. To make any additional edits, use the "Edit Lesson" option **(2)**.

Lesson Activities

The “Lesson Activities” option allows users to design focused lesson activities on any topic or content, thereby enhancing student engagement. By adapting activities to students' needs and interests, educators enhance personalized and effective learning. Select “Get started” to begin.

Step 1: Configure Activity

Begin by entering a topic, concept, or learning objective in the text field at the top of the screen (1). You may also enhance your prompt by attaching a file, aligning to academic standards, using voice input, or viewing example prompts.

Then select the interactive activity type (2) or allow the AI Assistant to choose by enabling Automatic. Choose the appropriate age group (3) from predefined ranges or set it to Automatic. Define the activity size (4) as Small, Medium, Large, or Automatic, and select a difficulty level (5)—Beginner, Medium, Advanced, or Automatic. Choose the preferred language (6) from a list or search bar, including options for Indigenous languages. Finally, decide on image usage (7): exclude, include when helpful, or always incorporate images.

Once all the settings are configured, click the “Create Activity” button to proceed to the next step

☒ No Images ☐ When Helpful ☐ Always Include

Step 2: Review & Edit

After configuring your lesson activity, you will then have the option to edit individual components. To the left of the screen is the AI actions. This includes options to:

- Generate similar items
- Decrease difficulty
- Increase difficulty
- Fix grammar
- Translate
- Incorporate a storyline

You can engage with the AI Assistant via the chat box (2) by typing specific commands in the text field or using voice dictation.

Depending on the type of lesson activity, extra customization options will become available (3). The AI tool (4) can also adjust the difficulty level and correct grammar for particular rounds, sequences, groups, or questions within the lesson activity.

The screenshot shows the 'Photosynthesis: Arranging the Steps' lesson activity interface. The interface is divided into a left sidebar and a main content area. The sidebar contains an 'AI Assistant' chat box (1) with a 'chat' button and a 'Voice' button. Below the chat box are three buttons: 'Generate similar items', 'Decrease difficulty', and 'Increase difficulty'. The main content area has a title 'Photosynthesis: Arranging the Steps' and a subtitle '2 sequences'. It features a 'Settings' button, an 'Add Sequence' button, and a 'Finish Review' button. The main content area is divided into two sections: 'Photosynthesis - Light-Dependent Reactions' and 'Photosynthesis - Light-Independent Reactions (Calvin Cycle)'. Each section has a 'SEQUENCE ITEMS (4)' list. The 'Light-Dependent Reactions' list includes: 1. Light energy is absorbed by chlorophyll. 2. Water molecules are split, releasing electrons, hydrogen ions, and oxygen. 3. Electrons move through the electron transport chain. 4. ATP and NADPH are produced, storing energy. The 'Light-Independent Reactions (Calvin Cycle)' list includes: 1. Carbon dioxide is captured from the atmosphere. 2. CO₂ combines with RuBP to form a 6-carbon molecule. 3. ATP and NADPH are used to convert the 6-carbon molecule into glucose. 4. RuBP is regenerated to continue the cycle. The interface also includes a 'What would you like to do with the' prompt at the bottom left.

Step 3: Launch Activity

Once you have finalized all edits and revisions for the lesson activity, select the "Start Activity" (1) option to commence the lesson activity (3). If you wish to continue making edits, choose the "Edit [Lesson] Activity" (2) option.

Reading Material

Reading Material

Generate educational reading materials with customizable content types and complexity levels.

NEW ☆

[Use tool →](#)

The “Reading Material” tool, which is also part of the Complete Lessons, generates educational reading resources. This tool offers customizable content types and varying complexity levels to suit different learning needs. Select “Use tool” to begin.

Step 1: Configure Content

Start by typing a prompt into the text field (1). You can also enrich your prompt by uploading a file, adhering to academic standards, utilizing voice input, or exploring example prompts for inspiration.

Under the “Reading Material Settings” choose the Content Type (2). This includes:

- Informational Text
- Narrative Story
- Explanatory Guide
- How To Guide
- Persuasive Text
- Biography

Select the appropriate age group (3) and choose the reading length (4). Select the level for reading complexity (5) and the desired language (6). Next, choose whether to include images (7) and any additional features (8) to include in the reading.

Lastly, decide to enable the AI Fact Checking option (9). Activate AI-driven fact-checking to validate information through web searches, ensuring greater accuracy.

Step 2: Review and Edit

Customizations for reading passages include the AI Assistant quick actions (1). This includes:

- Simplify Language
- Add Examples
- Add Key Vocabulary
- Incorporate a Storyline
- Create Summary
- Expand Content
- Add Comprehension Questions
- Translate
- Fix Grammar
- Suggest Visual Elements

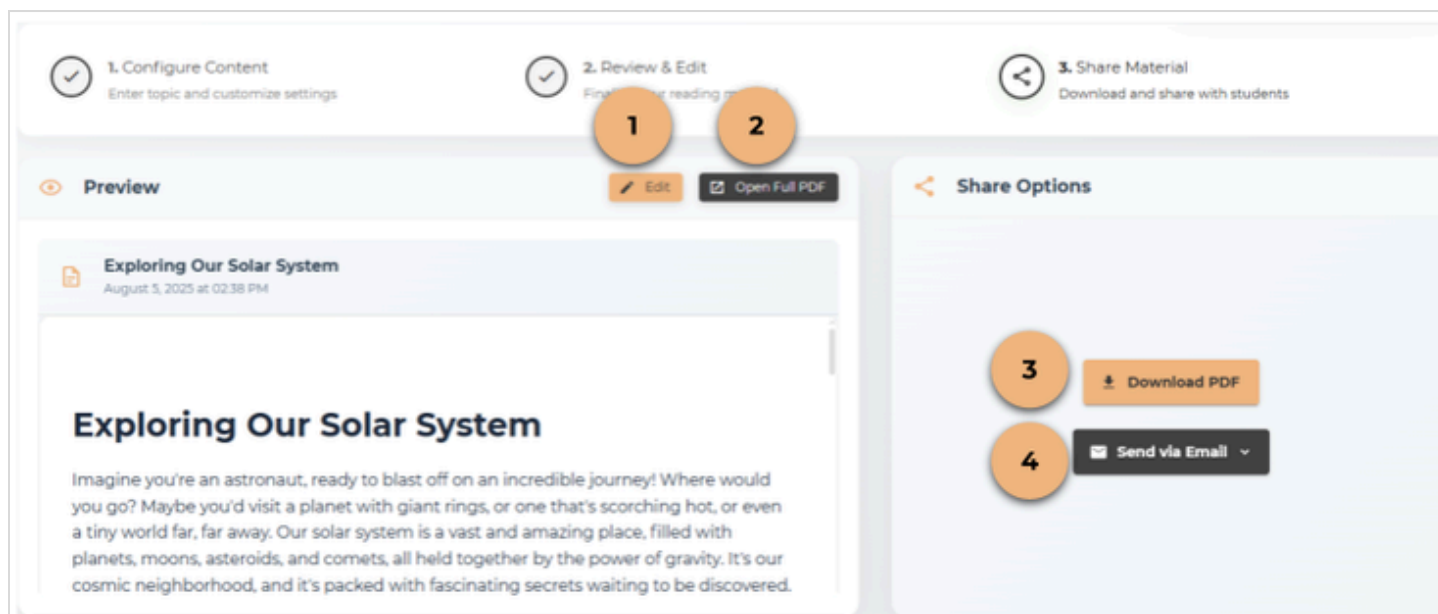

You can interact with the AI Assistant through the chat box (2) by entering specific commands in the text field or by utilizing voice dictation.

To manually edit the content within the reading passage, simply type directly in the document or use the toolbar (3) to modify formatting, add hyperlinks, images, and other features. Once you are happy with your changes, click on the “Publish” (4) icon.

Step 3: Share Material

Now that the reading material is complete, you may choose to return to the edit screen (1) or open the PDF (2) in a separate browser window. Share options also include the ability to download the PDF (3) or share via email (4). When sharing through email, a popup will appear, allowing you to choose your email service provider. You can select from options such as Gmail, Outlook, Yahoo Mail, Apple Mail, or your Default Email App.

Educational Podcast

Educational Podcast

NEW

Create engaging AI-generated podcasts with conversations and audio for any educational topic.

[Use tool →](#)

The “Educational Podcast” tool generates captivating AI-driven podcasts featuring conversations and audio on various educational topics. It also provides a text transcript for your convenience. Click “Use tool” to get started.

Step 1: Configure Content

Begin by entering a prompt into the text field (1). You can also enhance your prompt by uploading a file, relevant academic standards, using voice input, or checking out example prompts for inspiration. In the Podcast Settings section select the episode length (2), the language (3), age group (4) and complexity level (5).

Additional options include the conversation style (6), dialogue structure (7), and engagement techniques (8).

Lastly, choose the speaker persona (9) by utilizing the default suggestion or by typing in your own persona choice. Then select the voice (10) for the two podcast speakers.

To create the podcast, simply click on the “Create Podcast” icon. Keep in mind that generating podcasts may take a few minutes, but you can browse away from the page while you wait.

Step 2: Review

During the review phase you are able to listen to the podcast (1) and download the audio (2). An included transcript is also provided (3), which can be enabled when sharing the podcast with students. If you are satisfied with the Podcast content select “Publish Podcast” (4) or choose “Back” to reconfigure the Podcast.

The screenshot displays the 'Review' stage of the podcast creation process. At the top, a progress bar shows three steps: '1. Configure Podcast' (completed), '2. Review' (current stage), and '3. Launch Podcast' (pending). The main title of the podcast is 'The Great War: Unraveling the Causes and Consequences of World War I'. Below the title, there is a 'Back' button and a 'Publish Podcast' button. The central part of the interface features a podcast player with a cover image, a progress bar (0:00 / 5:55), and playback controls (play, pause, skip, volume). A circular callout '1' is placed over the play button, and another callout '2' is over the download icon. Below the player, the 'Podcast Transcript' section is visible, with a toggle switch labeled 'Show for students' and a callout '3' over it. The transcript contains three segments of dialogue between two speakers. A callout '4' is positioned over the 'Publish Podcast' button at the top right.

Step 3: Launch Podcast

The Podcast is ready to share with others. This can be done by choosing “Download Audio” or “Copy Share Link” (1). Enabling the “Show Transcript” (2) feature will provide the written transcript along with the audio. The transcript can be viewed by selecting “View Transcript” (3). Use the play icon (4) to play the Podcast or download (5) the audio.

Tags

Tags

Create engaging tags activities from any topic or content to engage students.

[Use tool →](#)

The “Tags” tool facilitates a lesson activity that allows students to identify and label elements within a diagram or image. This tool is effective for visually previewing and reviewing information. To get started, simply select “Use tool.”

Step 1: Select Image

To create the Tags lesson activity either upload an image from your computer or choose the “Search Images” option (1). There is also an option to use one of the example images (2).

Interactive Tags Activity

Transform images into interactive drag-and-drop tagging activities for students

Vegetables & Foods

Unlabeled table with various vegetables and foods for nutrition lessons

If selecting the "Search images" feature you have the option to use the search engines Bing, Unsplash, or the Noun Project. Type in the key words for your search in the text box (1) and choose any necessary filters (2), including aspect ration, image size, license type, image type, and color. There is also an option for creating AI Generated images (3). If selected, you can then provide a prompt to describe the image, determine the creation model (Imagen or Flux), the size, and the style.

Step 2: Review and Edit

Next choose the "Preview" option to view the placement of the Tags on the image, or choose "Edit" (1) to make adjustments. To add an additional Tag to the image select the

“Add Tag” (2) button. You can also manually edit the text or delete specific tags (3). When you are ready to proceed to the final step, select “Share” (4).

Image Creator

Image Generator

NEW

☆

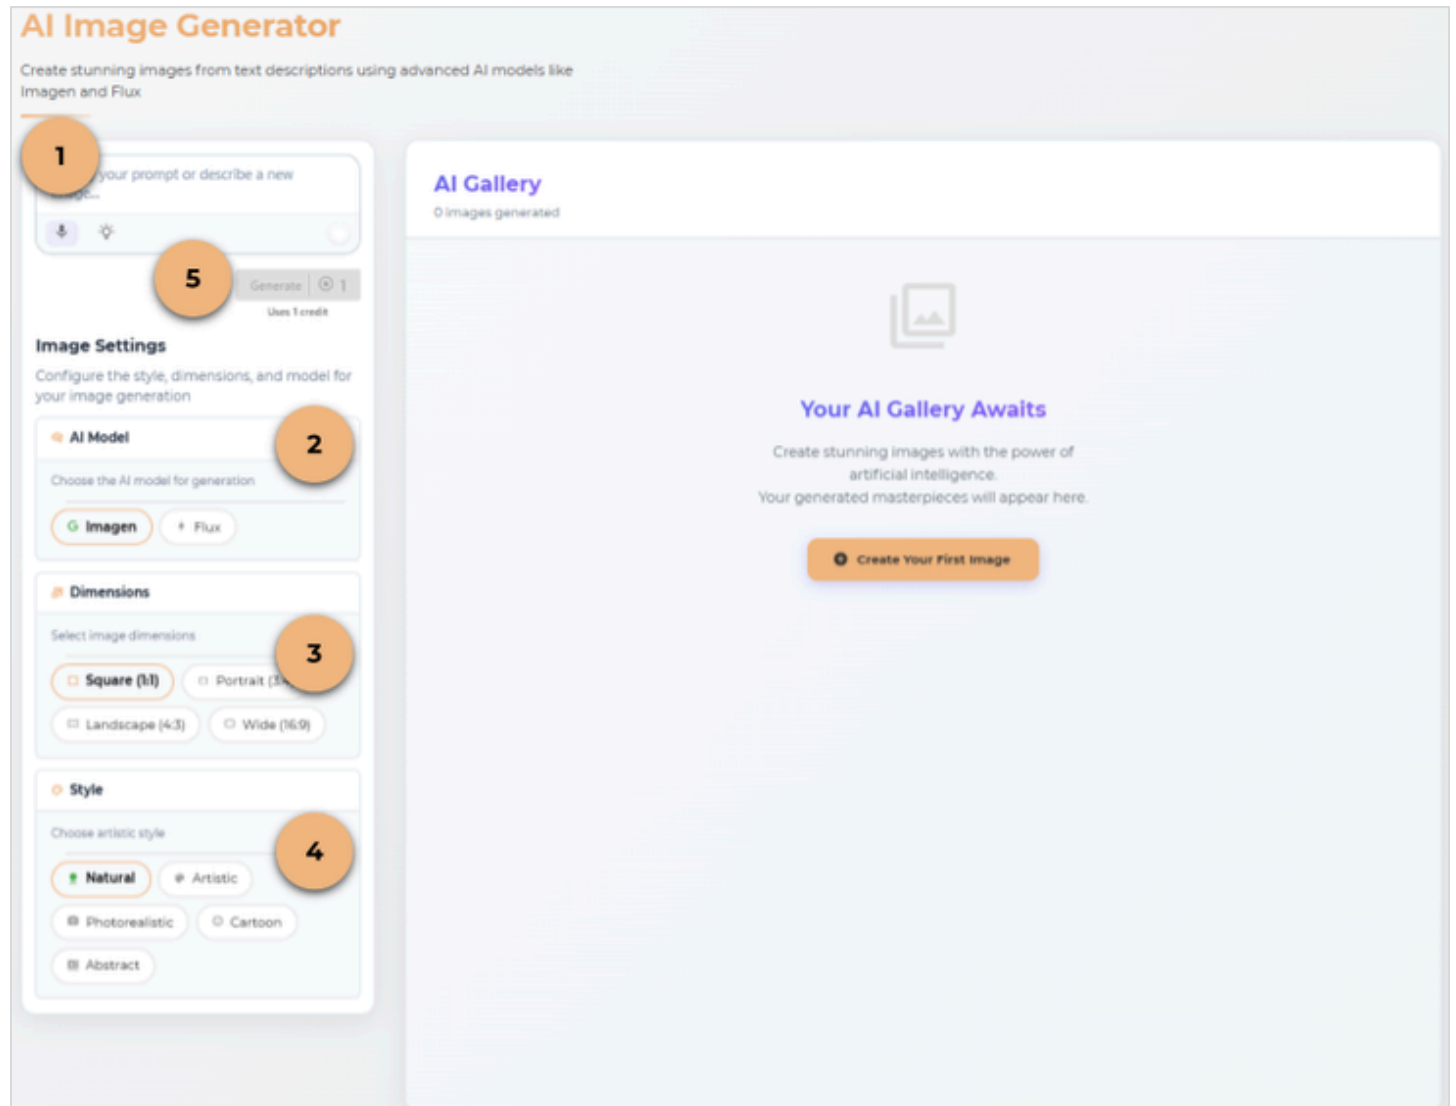

Create stunning images from text descriptions using advanced AI models.

Use tool →

The "Image Generator" tool uses AI to create images from text descriptions in various dimensions and artistic styles. Select "Use tool" to begin.

Step 1: Create

Begin by providing a prompt in the text box (1) or use voice dictation. You can also view example prompts for inspiration. The AI Assistant provides you with the chance to enhance your prompt as you input text. Then select the AI Model (2), choosing between Imagen or Flux. Next, select the Dimensions (3). Options include square, portrait, landscape, and wide. Lastly, select the artistic Style (4) for the image. You can choose between natural, artistic, photorealistic, cartoon, or abstract. When you are ready for the AI to create the image select the "Create" (5) icon.

Step 2: Share

Now that your image has been created, you can preview the image details (1). Clicking on the image will open a popup of a larger view. You can then choose to download the image or select "share" (2), which will copy the image URL to your clipboard. The image will also become part of your image gallery (3).

Original Prompt

A bustling marketplace in ancient Athens, filled with vendors selling olives, pottery, and textiles. Citizens in tunics and sandals mingle, discussing philosophy and politics against the backdrop of the Acropolis. Sunlight streams through the scene, highlighting the vibrant colors and textures of daily life.

Enhanced Prompt

A photorealistic, ultra-detailed depiction of a bustling marketplace in ancient Athens, 450 BC. Vendors hawk olives, intricate pottery, and vividly dyed textiles. Athenian citizens in linen tunics and leather sandals debate philosophy and politics. The Acropolis looms in the background, bathed in golden sunlight. Capture the textures of sun-baked stone, roughspun cloth, and polished ceramics. Use volumetric lighting to create depth and highlight the vibrant colors of daily life. High resolution, professional photography, 4:3 aspect ratio.

Creative Task

Creative Task

NEW

Create engaging creative tasks from any topic or content to engage students.

[Use tool](#) →

The “Creative Task” tool generates imaginative assignments centered around a particular topic or content. These tasks are designed with students in mind, prompting them to accomplish a defined objective. Select “Use tool” to begin.

Step 1: Configure Task

Begin by entering a prompt in the text field (1). You can also enrich your prompt by uploading a file, adhering to academic standards, utilizing voice input, or exploring example prompts for inspiration. Then choose the text type (2), selecting between:

- Automatic
- Design Challenge
- Creative Application
- Analysis Task
- Synthesis Project
- Problem Solving
- Reflection Questions

Then select the Task Length (3) and Language (4). Next choose the appropriate Age Group (5) and Task Complexity (6). Image Usage (7) will determine if images are included when helpful, always, or not at all. Then select the Additional Features (8), choosing from:

- Assignment Rubric
- Example Approaches
- Materials List
- Collaboration Options

Lastly, choose whether to enable the AI Fact Checking (9).

- ☒ Disabled ☐ Enabled

Step 2: Configure Task

Use the AI Assistant actions (1) to modify the Creative Task content. Options include:

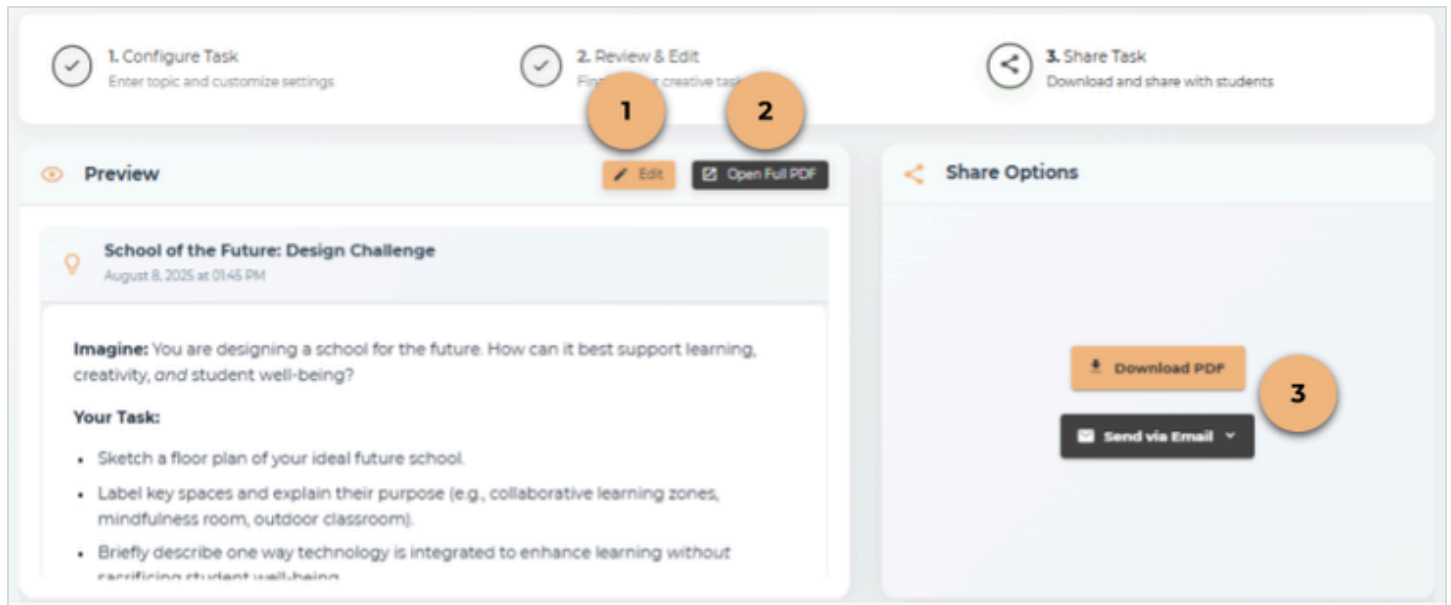

- Add Scaffolding
- Increase Challenge
- Add Collaboration
- Add Assessment
- Add Materials List
- Make More Open-Ended
- Add Extension Activity
- Simplify Instructions
- Add Creative Prompts
- Translate
- Create Themed Variation
- Add Visual Supports
- Add Reflection Questions
- Strengthen Real-World Connections
- Add Format Options

You can also use the chat box (2) to directly request edits from the AI Assistant. Manual entry and formatting options (3) are also available. When you are satisfied with the edits, select "Publish" (4).

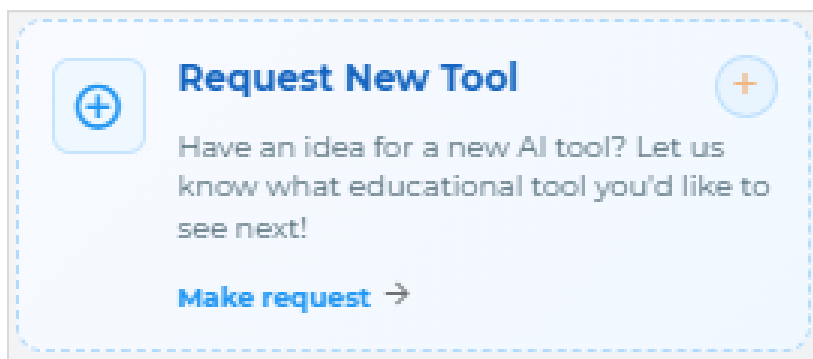

The screenshot displays the 'School of the Future: Design Challenge' task editor. The interface is organized into three main sections: 1. Configure Task (left sidebar), 2. Review & Edit (main workspace), and 3. Share Task (top right). The left sidebar features an AI Assistant chat box (1) and a list of actions like 'Add Scaffolding', 'Increase Challenge', and 'Add Collaboration'. The main workspace shows the task title 'School of the Future: Design Challenge' and a text editor with a rich text toolbar (3). The text editor contains the prompt: 'Imagine: You are designing a school for the future. How can it best support learning, creativity, and student well-being? Your Task: • Sketch a floor plan of your ideal future school. • Label key spaces and explain their purpose (e.g., collaborative learning zones, mindfulness room, outdoor classroom). • Briefly describe one way technology is integrated to enhance learning without sacrificing student well-being.' The top right shows the 'Publish' button (4). The bottom of the workspace shows word count (55 words) and reading time (1 min read).

Step 3: Share Task

Now that your Creative Task is complete, you may choose to make any final edits (1) or “Open Full PDF” (2). To share with others, select the “Download PDF” or “Send via Email” (3) options.

Request New Tool

At NUI TEQ, we continuously aim to enhance the user experience. If you have a suggestion for a new AI tool, please click on “Make request” to share your thoughts with us.

A popup will appear where you can describe your tool idea (1) and any additional details (2). You also may select “NUI TEQ may contact me via email regarding my tool request” (3) before choosing “Submit Tool Request” (4).
